PECFA UPDATE #38
December 11, 2008 PLEASE POST

ONLINE REPORTING REMINDER

Annual electronic reporting due dates are approaching for all occurrences that previously reported in December 2007.

As a reminder, annual reports must contain all analytical data collected since the last electronic report was submitted. If this data is not submitted, the report may be considered incomplete and costs for work completed may not be reimbursed.

In addition, incomplete reports may be considered to represent a "failure to make progress" at the site which could result in a cap reduction and/or potential disqualification of the consultant from further work on a project.

Failure to complete reporting for sites that were bid can result in a consulting firm's disqualification from future bidding.

Questions about online reporting requirements should be directed to the Commerce project or bid manager for that site.
