

WISCONSIN ACT 63

Wisconsin Act 63 soon requires licensing for individuals installing electrical wiring.

Previously, Wisconsin law did not require that a person be licensed or

certified by either the state or a local government to work as an electrician or electrical contractor. There was a voluntary state certification program for electrical work that municipalities could adopt, or municipalities could have their own program.

The new system is scheduled for April 1, 2013. This is an opportunity to further hone your skills and prepare yourself to take the exam.

STATE OF WISCONSIN WILL REQUIRE
LICENSING FOR ALL INDIVIDUALS
INSTALLING ELECTRICAL WIRING.

ATTEND A TRAINING COURSE TO PREPARE
FOR THE ELECTRICAL EXAM

We will provide this training program within 11 set classes and take into account the various upcoming fall holidays. This is the same program brought to you through technical colleges throughout Wisconsin. We encourage everyone not holding a Wisconsin Electrical Credential to attend.

**The last day of class will be the
state credential exam.**

COURSE CURRICULUM

Class/Date	Class Work
Class 1 Fri, Oct 23 9:00 AM –12:00	Review Schedule and Topics to be Covered. Review Comm 16. Take Quiz 0
Class 2 Fri, Oct 30 9:00 AM –12:00	Review Quiz 0. Review Units 1, 2, & 3. Take Quiz 1
Class 3 Friday, Nov 6 9:00 AM –12:00	Review Quiz 1. Review Unit 5. Take Quiz 2.
Class 4 Friday, Nov 13 9:00 AM –12:00	Review Quiz 2. Review Unit 6. Take Quiz 3.
Class 5 Friday, Nov 20 9:00 AM –12:00	Review Quiz 3. Review Units 4 and 7. Take Quiz 4.
Class 6 Friday, Dec 4 9:00 AM –12:00	Review NEC Chapters 5, 6, 7, 8, & 9. Take Quiz 5.
Class 7 Friday, Dec 11 9:00 AM –12:00	Review Quiz 5. Review Units 9, 10, & 11 on Load Calculations. Take Quiz 6.
Class 8 Friday, Dec 18 9:00 AM –12:00	Review Quiz 6. Review Unit 11 on Commercial Load Calculations. Take Quiz 7. Review Quiz 7.
Class 9 Friday, Jan 8 9:00 AM –12:00	Take Practice Exam
Class 10 Friday, Jan 15 9:00 AM –12:00	Review Practice Exam
Class 11 Friday, Jan 22 9:00 AM –12:00	Take State Exam

Course Description: Students will review basic electrical principals and basic code requirements drawn from the 2008 National Electrical Code. The emphasis will be on using Comm 16 and the 2008 National Electric Code to solve exam-type questions. The course content will concentrate on Chapters 1-4 of the NEC.

Objectives: The student will develop critical thinking skills needed to pass a certification exam.

Prerequisite: Three or more years of electrical construction experience

Required Texts:

-NEC Exam Preparation, 2008 Edition, Mike Holt, ISBN 978-1-932685-36-7 (you must bring)

-2008 National Electric Code (you must bring)

-COMM 16, effective date 3/1/09 (provided first day of class)

Recommended Text: *Ferm's Fast Finder Index (order through local bookstores or through IAEI, 1.800.786.4234) Calculations and Exam Questions and Answers, Tom Henry ISBN 0945495-62-5*

Additional Materials Required for Each Class:

1. Three-ring binder with notepaper
2. Silent, non-programmable calculator
3. Pencils

Core Abilities: The core abilities are skills that allow students to continually adapt and learn. You may not be tested for all of the core abilities directly, but you will demonstrate or apply them to complete lessons or to improve skills.

This list contains examples of the Core Abilities with an example of the method that you will practice the ability in this class.

Communicate Effectively by:

- *Listening actively to others. The Code will often be discussed in class.
- *Derive meaning from the text. You will often read a Code section and then explain the section in your own words.
- *Communicating in a bias free manner. You will often participate in activities such as in-class workshops.
- *Support viewpoints with evidence. You will need to provide code references to back up your answer.

REGISTRATION
Due October 15, 2009
No Registration at Door

FOR OFFICE USE ONLY:
wisnart Code 7634
Amount Received \$ _____

Attendee:

Name _____
